

Netc Embrace is a complete RFID and Barcode asset management solution. It has been designed for every type of user from small businesses, to large scale operations. Embrace helps you to better manage data tape and IT assets quickly and more effectively.

Small Business Solutions

An easy to use phone app is the solution. All you will need to do is snap a picture of the barcode on your assets and the software will do the rest. You will be able to check your inventory and find the location of any asset that has been added to the system.

You will also be alerted to any problems as soon as they happen right on your phone.

Unsure of what level product you need? Embrace is fully customizable to fit your exact needs. We will help you by doing a site survey to recommend exactly what products you will need. We will also work with you to customize the software to exactly what your company needs.

Large Scale Solutions

Netc Embrace can also utilize RFID handhelds and portals for high volume asset tracking. It can be as simple as including a RFID portal in your business and letting the system do the work for you. We can also do a site survey for you and recommend the exact level of Embrace that will help you easily track all of your assets.

Embrace seamlessly integrates with Netc RFID cases.

Key Features:
